YEARBOOK STAFF

SOUNDINGS 1991-92

The REAL Soundings Staff

As always, some people just come for the picture and then they show up at a few meetings. They can all marvel at what those who stuck around and committed themselves to this yearbook actually did. The few that did actually go the distance should not be disappointed.

For the first time, the yearbook was designed almost entirely using an Apple Macintosh PageMaker program. This made it much easier as far as time and money. It also allowed us to correct the few errors we made before we sent the pages to be published.
